DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Group I, claim(s) 1-18, 24, and 26-28, drawn to isolated nucleic acids encoding US2, vectors encoding US2 and methods of using the same.

Group II, claim(s) 19-23, 25, and 29-38, drawn to purified protein having US2 activity and methods of using the same.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: a nucleic acid encoding a US2 protein is not the same special technical feature as a soluble US2 protein because nucleic acids and proteins are substantially different in structural, chemical, and biological properties, are made using substantially different techniques and can be used for substantially different purposes. In particular, please note that a US2 protein can be purified from a cell extract or chemically synthesized and does not require the isolated nucleic acid for its production. Also, the nucleic acid can be used for purposes other than producing a US2 protein, such as the use of the nucleic

acid in *in vitro* hybridization or PCR assays. Thus, since the claims do not share a special technical feature and are separately patentable, restriction under 35 U.S.C. 121 and 372 is proper.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
